STAND UP PADDLING 2.0

For our boards, we use the very best dropstitch material available on the market: woven pre-laminated double layer, knitted pre-laminated double layer, woven real double layer, woven single layer or knitted single layer.

Für unsere Boards verwenden wir das allerbeste Dropstitch-Material, das auf dem Markt erhältlich ist: Woven Pre-Laminated Double Layer, Knitted Pre-Laminated Double Layer, Woven Real Double Layer, Woven Single Layer oder Knitted Single Layer.

The fiberglass reinforcements under the feet ensure a hard and direct base and give a real hardboard feeling.

Die Fiberglass-Verstärkungen unter den Füßen sorgen für eine harte und direkte Unterlage und für regelrechtes Hardboardfeeling.

The tear-off edge under the tail lets the water flow off better and gives you even more speed.

Die Abrisskante unter dem Tail lässt das Wasser schneller unter dem Board wegströmen und gibt euch noch mehr Speed.

All inflatable Touring and Race boards have a straight shape without a nose rocker for better speed and directional stability.

Alle Inflatable Touring- und Race Boards haben einen geraden Shape ohne Nose-Rocker für mehr Tempo und Geradeauslauf.

Thanks to the two-piece split finbox you can roll and stow your board much more easily.

Dank der zweiteiligen Finbox kann das Board viel einfacher gerollt und damit bequemer im Bag verstaut werden.

The Hyperflow fins, made of sturdy polyamide with anti-seaweed technology and plenty of surface for optimal directional stability, will fascinate with the first paddle stroke.

Die Hyperflow-Finnen aus stabilem Polyamid mit Anti-Seegegras-Technologie und viel Fläche für den optimalen Geradeauslauf werden euch schon bei den ersten Paddelzügen faszinieren.

With the Smart Finbolt you can attach the fin into the split finbox in no time at all.

Mit dem Smart Finbolt lässt sich die Finne ruckzuck in die Split Finbox einsetzen.

The camera can be easily mounted on the nose of the board. Our D-Ring patch has a 1/4-inch thread for cameras with tripod adaptor.

Die Kamera lässt sich einfach auf der Inflatable-Brettnase montieren, denn unser D-Ring-Patch hat ein 1/4-Zoll-Gewinde für Kameras mit Stativ-Adapter.

With the detachable shoulder strap you can comfortably transport your board to the water.

Mit dem abnehmbaren Schultergurt transportiert ihr euer Board ganz bequem zum Wasser.

All wheelie bags are equipped with the Paddle Connecting System. The paddle works as a draw bar with which you can pull or push the wheelie bag. Getting to the water has never been more relaxed.

Alle Wheelie Bags sind mit dem Paddle Connecting System ergänzt. Das Paddel funktioniert als Deichsel, mit der ihr die Rolltasche ziehen oder schieben könnt.
